solutions

Flexi-Seal[®] FMS:
Protect your patients with an
advanced fecal incontinence
management system

ConvaTec leads* the way with incontinence management solutions

Advanced fecal incontinence management solution

Challenge	Solution	 <p>Completely latex free</p>
Patient care challenge	Flexi-Seal® FMS is an advanced fecal management system for patients with liquid or semi-liquid stool:	
<ul style="list-style-type: none"> • Skin breakdown 	<ul style="list-style-type: none"> • Soft, flexible, silicone catheter contains fecal matter to help reduce the risk of skin breakdown 	
<ul style="list-style-type: none"> • Spread of serious infection including <i>Clostridium difficile</i> (<i>C difficile</i>) 	<ul style="list-style-type: none"> • Closed-end system is designed to eliminate fecal contact to help prevent spread of infection 	
<ul style="list-style-type: none"> • Adverse effects from fecal contamination of wounds, surgical sites, and burns 	<ul style="list-style-type: none"> • Closed-end system is designed to help protect wounds, surgical sites, and burns from fecal contamination 	
<ul style="list-style-type: none"> • Rectal necrosis, perforation, and sphincter damage 	<ul style="list-style-type: none"> • Soft, low-pressure balloon is filled with water or saline and gently conforms to the rectal vault to help reduce the risk of necrosis • Soft, flexible, silicone catheter conforms to sphincter anatomy to help preserve sphincter tone and function 	

*According to 2005 industry syndicated sales data reported by HPIS.

solutions

Continuously advancing skin care management

Challenge	Solution	
Skin care challenge	Aloe Vesta® skin care products are the solution for incontinent patients:	
<ul style="list-style-type: none"> • Irritation associated with cleansing 	<ul style="list-style-type: none"> • Aloe Vesta® Cleansing Foam —extra-gentle, pH-balanced, no-rinse formulation for perineal, body, and hair cleansing 	
<ul style="list-style-type: none"> • Protecting fragile skin 	<ul style="list-style-type: none"> • Aloe Vesta® Protective Ointment —seals out moisture, protects skin and is designed to reduce the risk of skin breakdown 	
<ul style="list-style-type: none"> • Protecting damaged skin 	<ul style="list-style-type: none"> • Aloe Vesta® Protective Barrier Spray —seals out moisture and protects skin —sprays from any angle without rubbing or further damaging skin 	
<ul style="list-style-type: none"> • Managing weepy and denuded skin 	<ul style="list-style-type: none"> • Sensi-Care® Protective Barrier —helps treat weepy/denuded skin and helps prevent further breakdown from irritants in feces/urine —use on sensitive, at-risk skin around pressure ulcers (stages I-II) in the perineal area 	

Forward-thinking solutions

Created with the goal of dramatically improving patient care

- A 74-year-old woman with diabetes was admitted to the ICU with overwhelming sepsis and developed large, hemorrhagic lesions due to a hypersensitivity reaction (Sweet Syndrome)⁵
- Using Flexi-Seal[®] FMS helped prevent severe irritant dermatitis and additional wound deterioration³

Day 1 with Flexi-Seal[®] FMS³

Day 5 with Flexi-Seal[®] FMS³

Day 22 with Flexi-Seal[®] FMS—
wound healed³

Flexi-Seal[®] FMS—advanced fecal incontinence management in a clinical study

- Investigators reported that **skin condition was improved or maintained for 92% of test participants**^{*,1}

Aloe Vesta[®] and Sensi-Care[®]—advanced skin care management To simplify care and help enhance patient outcomes

- **The incidence of pressure ulcers was reduced by 87%**^{†,2} in a clinical study using the *Solutions*[®] validated protocols of care, which included ConvaTec Aloe Vesta[®] skin care products in addition to other proven modalities
