Engineering (
Venilation:	Provide gen	eral or local exhaust ventilation systems to maintain airborne concentrations
	below OSHA	A PELs (sec.2). Local exhaust ventilation is preferred because it prevents contaminant
	dispersion in	nto the work area by controlling it at its source.
Administrativ		
Respiratory P	Protection:	Seek professional advise prior to respirator selection and use.
		Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear
		a MSHA/NIOSH-approved respirator. Select respirator based on its suitability
		to provide adequate worker protection for given working conditions, level of
		airborne contamination, and presence of sufficient oxygen. For emergency or
		nonroutine operation (cleaning spills, reactor vessels, or storage tanks), wear
		an SCBA. Warning! Air-purified respirators do not protect workers in oxygen-deficient
		atmosheres.
Protective Clo	othing/Equip	ment: Wear chemically protective gloves, boots, aprons, and gauntlets to prevent
		prolonged or repeated skin contact. Wear protective eyeglasses or
		chemical safety goggles, per OSHA eye and face protection regulations
		(29CFR 1910.133). Contact lenses are not eye protective devices. Appropriate
		protection must be worn instead of, or in conjunction with contact lenses.
Safety Station	ns: Make	e emergency eyewash stations and washing facilities available in work area.
-		Separate contaminated wprk clothing from street clothes. Launder before
- on an in a lot	qa.p.i.o.it.	re-use. Remove this material from your shoes and clean personal protective
