

Step 1: Remove your DomeHouse™ from the pack.

Step 2: Grab the center of the hub and pull the strap until the wall pops out.

Step 3: Repeat Step 2 until all walls are popped out.

Step 4: Begin assembling the fiberpoles by inserting one capped end into the pocket near the floor. Insert the other end into the pocket directly across from the first.

Step 5: Repeat Step 4 with the other poles, inserting them into the pockets directly across from each other.

Step 6: Secure the fiber poles.

Step 7: Secure your DomeHouse™ by using the supplied stakes and high wind tie-downs.

Step 8: Enjoy your DomeHouse™.

Step 1: Begin by removing all stakes and high wind tie-downs. It may be easier to use the head of one stake to remove another. Be sure to also remove the interior fiber poles.

Step 2: With an open palm, push on the hub of one of the walls. It will collapse. Continue around the DomeHouse™ pushing on each of the hubs of the walls until all have collapsed.

Step 3: Gather the corners of the DomeHouse™. Use the provided material to tie around it to hold in place (See 3 & 3b).

Step 4: Place the DomeHouseTM in its pack with the hubs down
(See 4 – 4c).

Step 5: Store the stakes and high wind tie-downs in the pouches provided and place them in the pack.

Step 6: Now you can take your DomeHouseTM anywhere!
