VITAMIN E ENRICHED

- *Contains Glycerin And Dimethicone*
- *Helps Moisturize Skin*
- *Soothes Minor Skin Irritations*

CliniShield® Moisturizing Lotion

- A unique lotion with skin moisturizing and protective properties in one formula.
- CDC recommends that caregivers periodically use a moisturizing lotion to maintain healthy skin. Nurses with dermatitis on their hands have a greater number of colonizing germ species. Moisturizing hands can help stop the spread of bacteria.
- Very low, appealing fragrance that does not linger.
- Absorbs quickly into the skin with no oily or greasy residue.
- Contains dimethicone and glycerin for added moisturizing capacity.
- CliniShield® Moisturizing Lotion was demonstrated to not degrade latex gloves in laboratory testing using ASTM Test Methods D 412 and D 624 and the FDA Water Leakage Test. Leading brands of latex gloves, both surgical and examination types, were tested for Tensile Strength and Tear Strength before and after exposure to CliniShield® Moisturizing Lotion. Results showed the product does not alter the physical integrity of latex gloves after exposure up to 4 hours.
- CliniShield® Moisturizing Lotion is compatible with CHG containing handwash products.

<u>Stock #</u>	<u>Size</u>	<u>#/Case</u>
87019	16 fl. oz. w/ pump	12 bottles/case
87018	1600 ml bottle	6 bottles/case
