

Remedy[®] with Pabulum^{3™}

Natural
Nourishing
Science

To ensure the skin maintains its functionality and healthy appearance, it requires three major elements: Quality Ingredients, Proper Nutrition, and Balanced Moisture Levels. While some skin care lines address the first of these concerns, rarely does one encompass them all.

Remedy with Pabulum³ is one such line.

The Science Behind **Pabulum³**

Nourishes the skin with blue green algae, vitamins, minerals and other micronutrients

- Contains beta-carotene and B-Complex vitamins, enzymes, chlorophyll, fatty acids, proteins, lipids, carbohydrates and minerals.

Soothes the skin and helps protect it from oxidation

- Clove flower and green tea extracts help protect from free radical damage because they contain powerful antioxidants to defend skin from reactive oxygen species (ROS) and oxidation.
- These ingredients also help soothe calm tender skin and relieve discomfort.

Moisturizes with natural emollients

- Hydrolyzed Soy Protein, Yeast extract, Phospholipids, and Cholecalciferol (Vitamin D) address skin's porosity and restores its ability to retain moisture.
- Peptides enhance the skin's moisture retention capacity and the ability to restore balance.

Remedy[®] Lip Balm with Pabulum³

Rough, dry lips are more than an inconvenient problem for many individuals; they are a complication to an already uncomfortable situation.

Don't give them just any product, give them a REMEDY.

No Petroleum Derived Ingredients

Remedy Lip Balm contains only natural conditioners such as Sunflower Seed Oil, Soybean Oil, Meadowfoam Seed Oil, Jojoba Oil, Shea Butter and Beeswax that deliver essential oils (Omega 3 and Omega 6) helping retain moisture.

This alleviates the need for petrolatum, mineral oil or paraffin that clog the pores and leave lips feeling greasy.

Enhanced with Pabulum³

Remedy Lip Balm provides the nutrition, moisturization and protection from free radicals that lips need to remain healthy.

Encapsulated Flavor Crystals and Cooling Menthyl Lactate to Soothe

The citrus and cooling flavors start acting as the lips are moistened and continue keeping them feeling refreshed for hours.
