

SLIPPERSOCKS from Medline®

According to the Centers for Disease Control and Prevention, in 2005, 19,656 deaths occurred due to unintentional falls.¹

Changes such as installing grab bars, adding raised toilet seats, lowering bed heights, and installing handrails in hallways can help prevent unintentional falls that occur in healthcare facilities.

To complement these changes, Medline's soft and cozy slip-resistant slippers are designed for safety with skid-resistant treading to ensure traction and provide added patient comfort.

Medline can help prevent patient falls

One step at a time ...

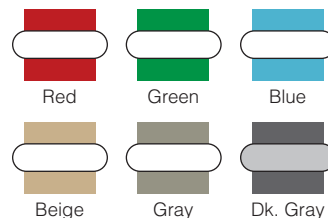

Double-Tread Slippers with Double the Traction

A Cozy Way to Stay Safe

With an innovative tread on the top and bottom, this slipper provides a continuous grip for patients even if the slipper twists on the foot.

- Slip-resistant tread on the bottom and the top provide a continuous grip to help prevent patient falls
- Supple terrycloth on the inside absorbs perspiration and provides comfort and warmth
- Bariatric size provides extra stretch in the cuff and body for added comfort
- Easy to slip on and off

Item	Size	Color	Packaging
