

PATRIN PHARMA, Inc.

Material Safety Data Sheet

Substitute For

HYSEPT™ Solution

Sodium Hypochlorite (0.50% or less)

HYSEPT™ Solution is not considered a hazardous substance (29CFR 1910.1200 Subpart Z) and not listed as Hazardous material per DOT (49 CFR 171.101) therefore a Material Safety Data Sheet is not required.

HYSEPT™ products are topical, over-the-counter (OTC) products, which are generally recognized as safe and effective. Please follow all labeled instructions on the product.

The main ingredients in HYSEPT™ products are Sodium Hypochlorite, Purified Water and Sodium Bicarbonate as buffering agent. HYSEPT™ Solution products have a pH range of approximately 9-10.

**Do NOT take internally - FOR EXTERNAL USE ONLY.
In case of an emergency, contact nearest healthcare facility.**

HYSEPT™ products are not listed as Hazardous Chemicals, therefore they are not subject to OSHA's "Right to Know" Hazardous Chemicals requirements, including a Material Safety Data Sheet. (29 CFR 1910.1200, Subpart Z). HYSEPT™ products are not listed as Hazardous Chemicals in Department of Transportation regulations (49 CFR 172.101). Updated 2-2012

RE: Safety Data Sheet (SDS) Request

To whom it may concern,

The general purpose of an SDS is to provide appropriate warnings and safety information about potentially hazardous chemicals handled in an occupational setting. Without an SDS, such information may not be available to employees involved in manufacturing.

Products packaged for retail sale contain the information necessary to properly warn and advise the consumer and are specifically exempted from the requirement to have an SDS. Rx and OTC drugs⁽¹⁾ manufactured or distributed by Patrin Pharma in final retail packaging fall within this exemption. Likewise, products sold as medical food or those that do not have any toxic substances are generally not considered hazardous and are exempted from the requirement to have an SDS⁽²⁾.

Based on these exemptions under the federal OSHA Hazard Communication Standard, SDSs are not required for the product requested. Product labels provide health cautions appropriate for the product and should be consulted for any concerns. If you have an emergency which requires additional guidance, please follow the directions on the package. If you have any questions regarding this issue, please do not hesitate to contact us at 800-936-3088 or send an email to customerservice@patrinpharma.com.
