

March 27, 2018

Dear Valued Customer:

Contec has adopted the Globally Harmonized System for Hazard Communication (GHS) for implementation of Safety Data Sheets (SDSs). With this systemized approach, Contec provides SDSs for manufactured products that contain hazardous substances or liquid mixtures of substances that are potentially hazardous.

Dry products that are not classified as hazardous materials do not fall within the scope of GHS regulations. This type of product can include, but is not limited to dry wipers, empty containers/canisters, or testing strips. For this reason, Contec does not have a SDS on file for this type of product.

Please feel free to contact me should you have any questions or concerns. Thank you for your interest in Contec products.

Sincerely,

Jenni Russell
