

Intermittent Catheters

McKesson intermittent catheters minimize urethral trauma and reduce the chance of bringing bacteria in to the bladder. The ready-to-use catheters are designed to help quickly and easily self-catheterize. They're offered in straight and Coudé tips and female or male/universal lengths. Available in the following French sizes: 10, 12, 14, 16, 18 Fr/FR

McKesson hydrophilic catheters are the preferred cathing system for those who experience the sensation of pain, pressure, or discomfort during the cathing process. Hydrophilic catheters come pre-lubricated and always optimally hydrated to promote excellent gliding properties that ensure easier, more comfortable insertion. Hydrophilic catheters have been shown to lead to better patient satisfaction with this type of technique by reducing the risk of urethral damage due to decreased friction. Available in the following French sizes: 10, 12, 14, 16, 18 Fr/FR

Features and Benefits

Uncoated Catheters

- Offered in straight or Coudé tips
- Funnel end for ease of handling (except MFR# 16-F614L)
- Color-coded to indicate French size
- Available in 10, 12, 14, 16, 18 Fr/FR
- Non-coated
- Not made with natural rubber latex

Hydrophilic Catheters

- Offered in straight or Coudé tips
- Packaged with sterile water
- Coated with a hydrophilic layer consisting of PVP/ poly(vinyl pyrrolidone) and sodium chloride/NaCl
- Color-coded to indicate French size
- Available in 10, 12, 14, 16, 18 Fr/FR
- Hydrophilic
- Not made with natural rubber latex
