## Tuberculin Syringe with Safety Needle

Prevent® SG Tuberculin (TB) Syringe with Safety Hypodermic Needle is specifically designed to deliver small doses of medicine. This single-use, 1cc (1mL) syringe has a permanently attached 27 gauge x 1/2 inch needle and a safety activation arm that rotates to allow for preferred bevel orientation and readability of the graduation marks on the barrel.

### FEATURES AND BENEFITS

- May help to increase compliance with OSHA standards/requirements
- Fluid forefinger activation with minimal training and virtually no change in clinician technique
- Safety arm rotates to allow for preferred bevel orientation or for readability of the syringe graduation marks
- Highly legible graduation marks help ensure dosing accuracy
- Regular Wall
- Single-handed activation keeps your finger behind the needle at all times, helping you stay safe and efficient
- Sterile
- Non-pyrogenic
- Not made with natural rubber latex
