

Angiography Drape

McKesson angiography drapes deliver optimal protection and performance in creating and maintaining a sterile field during general surgical procedures. Specifically designed with SMS fabric for fluid repellency to reduce fluid strike-through, McKesson angiography drapes include advanced reinforcement fabric that provides high fluid absorbency around the fenestration to promote superior fluid management.

Features and Benefits

- Circular aperture for optimal brachial access
- Low-linting SMS fabric properties reduce particle generation
- Flame-resistant polypropylene prevents ignition risks associated with the use of high-energy medical devices during surgery
- Individually packaged, disposable design for single sterile use and consistent quality
- Not made with natural rubber latex
