

Catheter Securement Device

The McKesson catheter securement device is an adhesive urinary catheter anchoring device designed to comfortably secure the catheter, thereby helping reduce bladder neck irritation, urethral trauma and accidental catheter removal. It gives the patient the ability to move around freely without uncomfortable tugging or worry about the catheter being pulled out. The device is breathable and latex-free.

Features and Benefits

- Provides an efficient standardized system for securing indwelling urinary catheters
- May comfortably remain in place for 3-5 days without altering skin integrity
- Quick and easy to apply and remove
- Improves patient comfort and helps avoid complications due to foley catheter movement
- Cost effective
- Allows for repeated access to tubing
- Breathable and latex-free
