

Nasal Cannulas

McKesson Nasal Cannulas are used for delivery of lower flows of oxygen and are ideal for long-term oxygen therapy. They are available in a variety of tube lengths and configurations. All cannulas are designed for single patient use. The line also includes foam ear cushions, which can be added to the tubing for additional comfort. Ear cushions slide easily onto tubing and put less pressure directly on ear to help prevent chafing and tissue injury. O₂/CO₂ Sampling Cannulas offer accurate, easy to use cannulas for CO₂ monitoring applications.

Features and Benefits

- Made of injection-molded soft plastic for patient comfort
- Anatomical tips and over-the-ear placement provide an easy fit helping to reduce the risk of irritation and pressure sores
- “No Crush” lumen tubing helps maintain open flow of oxygen
- Universal oxygen connectors ensure compatibility with all types of oxygen concentrators
- Nasal prongs are available in straight, contoured, and extra comfort styles
- Straight prongs help ensure consistent delivery of oxygen
- Contour prongs have a soft feel to help prevent skin shearing
- Over-the-ear comfort design helps minimize friction and aid in the reduction of pressure ulceration
- Ear cushions are disposable
- O₂/CO₂ Sampling cannulas in various lengths, sizes and configurations for CO₂ monitoring while administering conscious sedation or post-op recovery
- Not made with natural rubber latex

Satisfaction Guaranteed

If you are not completely satisfied with any McKesson Brands product, you may return it for a full refund or credit.

Never Compromise on CareSM

With McKesson Brands, you'll never have to compromise. We deliver quality products at competitive prices, backed by our 100% satisfaction guarantee. We have decades of experience in the market, and we offer you support and work to help ensure you have the products you need, when you need them—making it even easier for you to provide the best care for your patients.

The product information contained in this document, including the product images and additional product materials, was collected from various supplier sources.
