

EasyOne® Air Spirometry System

The McKesson Lumeon® EasyOne® Air spirometer offers true portability for testing anytime, anywhere. The spirometer is intended to conduct diagnostic spirometry testing of adults and pediatric patients (more than four years old) to determine how much air a person's lungs can hold and how quickly that air can be expelled with a forceful, maximum effort. The spirometer is equipped with ready-to-use EMR connectivity and a user-friendly interface which makes it ideal for physician's offices, hospitals and long term care facilities.

The McKesson Lumeon® EasyOne® flow tube is a disposable mouthpiece that helps reduce risk of cross-contamination. Resistance-free testing is for precise measurement.

Features and Benefits

EasyOne® Air Spirometer

- Long-lasting rechargeable batteries last for approximately 400 tests
- No calibration required which reduces down time and helps to ensure low operating costs
- High accuracy of results
- Direct printing and PC connection possibilities allow for different report options
- Not made with natural rubber latex

EasyOne® Flow Tube

- Disposable mouthpiece helps reduce risk of cross-contamination
- Resistance-free testing for precise measurement
- Non-Sterile
- Not made with natural rubber latex
