

Suction Connecting Tubing

McKesson suction connecting tubing is a clear, non-conductive tubing that connects the suction catheter to the suction canister and is designed to evacuate fluid and debris. Each tubing end has two soft universal female connectors for convenience and provides a secure attachment to any standard male connection. Tubing has minimal coil memory and comes in a wide range of sizes. Selection also includes an economy option in both 3/16" and 1/4" diameter, in lengths ranging up to 20'.

Features and Benefits

- Strong material provides high collapse resistance
- Wide range of sizes and configurations allows for efficient, cost-effective setup
- Clear PVC-formulation with striated walls provides clear visualization, superior strength and secure suction
- Two female connectors; One straight male connector
- 100-foot bulk roll features 16 male connectors
- Single use
- Sterile and non-sterile configurations
- Not made with natural rubber latex

Satisfaction Guaranteed
If you are not completely satisfied with any McKesson Brands product, you may return it for a full refund or credit.
