

Enteral Feeding Gravity Sets

McKesson enteral feeding gravity sets with ENFit connectors are to be used when no enteral feeding pump is available. The feeding sets are intended for administration of enteral nutrition, fluids or medication. They are available in large or small bore.

Features and Benefits

- All sets include a pre-attached feeding tube transition connector (for feeding tubes without the ENFit connection system)
- All sets also include an ENFit connector which eliminates I.V. misconnection, improving patient safety
- The connector is compliant with the ENFit ISO 80369-3 design standard which supports the goal to improve patient safety by reducing the risk of misconnections
- Graduated measurements and translucent material allows for the monitoring of fluid level
- Each gravity bag has a pouch to potentially hold ice for formulas or medications requiring cooler temperatures
- Roller clamp adjusts the flow rate of feeding
- Not made with DEHP, non-sterile
- Not made with natural rubber latex
