# Section10 : Stability and Reactivity

Stability : Stable Hazardous Reaction : Dust explosion, like most finely grained organic powders. Condition to Avoid : Not applicable in normal use. Materials to Avoid : Not applicable in normal use. Hazardous Polymerization : None Hazardous Decomposition or Byproducts : Decomposition products will not occur.

Acute Toxicity Acute Oral Toxicity (LD50) : 5000 or over (Based on other product test results of similar ingredients.) Acute Dermal Toxicity : Not available Acute Inhalation Toxicity : Not available Local effects Acute Skin Irritation(PII) : 1.0 or below (Rabbit) (Based on other product test results of similar ingredients.) Acute Eye Irritation : Non-irritant (Based on other product test results of similar ingredients.) Sensitization Acute Allergenic Effects : Non-skinsensitive (Marmot) (Based on other product test results of similar ingredients.) Specific Effects Carcinogenicity : In 2008 IARC the re-evaluated Titanium dioxide as a Group 2B carcinogen for which there is inadequate human evidence, but sufficient animal evidence. The latter is based upon the development of lung tumors in rats receiving chronic inhalation exposures to Titanium dioxide at levels that induce particle overload of the lung. Use of this product, as intended, dose not result in inhalation of excessive dust. Epidemiological study to date have not revealed any evidence of the relationbetween exposure to titanium dioxide and diseases of the respiratory tract beyond general effects of dust. Mutagenicity : Negative (Ames test) Reproduction Toxicity : Does not contain substances listed as hazardous to reproductive health. Teratogenic : Not available
