

# Solar Shade

## -BEFORE YOU BEGIN-

### ■ First...

Read these instructions thoroughly before you begin assembly. Assembly is easiest if you follow the steps in the order shown.

### ■ Check all parts

Compare the parts you have to the parts list, If a part is missing, circle the part in question and call our toll-free # at (800) 437-0784.

**Always wear OSHA-approved safety glasses throughout the assembly process**

### ■ Tools Required

- Electric Drill with:
  - #2 Phillips Tip & 1/4" Socket
- Pencil
- Tape Measure

<input type="checkbox"/> 4	-- Support Bracket
<input type="checkbox"/> 12	-- Hook
<input type="checkbox"/>	-- 1/2" Self Tapping Screws
<input type="checkbox"/>	-- 1" Screws

Hook

Support Bracket

Shade Assembly

### 1. Install Support Bracket

Locate support bracket above window in corner where rafter spacer meets rafter as shown. Secure bracket onto rafter using two 1" screws.

Repeat for opposite side of window and each additional shade.

**2. Locating Shade Catch Hooks:**

The hooks can be located anywhere along the flange of the window depending on your personal preference. These instructions show them located at the top, middle and bottom of the window.

By following our example, the shades can be fully open, closed to half or fully closed.

**Install Shade Hooks:**

Attach shade hooks to window flange using 1/2" self tapping screws.

**3. Set Spring Tension**

While holding shade assembly in direction of installation, first adjust the spring tension by winding roller "clockwise" 5 to 7 complete turns.

**4. Install Shade Assembly**

Place shade assembly between support brackets (without releasing tension) with tension pin in the up position. (This will provide continuous tension on the shade).

**3**

Wind Roller

**4**

Installation is complete, now open shade to desired position and secure by placing the pins located at the ends of the shade pull into the shade catch hooks.
