30" Shed Extension Kit for Existing
11' Sheds
MODEL #0125

ASSEMBLY
INSTRUCTIONS AND
OWNER'S MANUAL

Save this instruction in the event you must contact the manufacturer for replacement parts.

****A MINIMUM OF TWO ADULTS ARE REQUIRED FOR ASSEMBLY****

BEFORE BEGINNING ASSEMBLY

Identify and inventory all parts using the checklist boxes on the Parts List. Keep the hardware bags and their contents separate. If any parts are missing, call our Customer Service Department.

SAFETY INSTRUCTIONS

Failure to follow these safety instructions may result in serious injury or property damage. Proper and complete assembly, use and supervision is essential for proper operation and to reduce the risk of accident or injury. A high probability of serious injury exists if this display is not installed, maintained, or operated properly. • If using a ladder during assembly, use extreme caution. Follow all warnings and cautions on the ladder carefully. • 2 people are required for assembly. • Misuse could result in system failure. • If technical assistance is required, contact the manufacturer.
Most injuries are caused by misuse and/or failure to follow instructions.

If you are Extending an New Shed

1. To obtain instructions for extending a new shed, contact our Customer Service Department.

***To extend a never assembled shed,
Call Customer Service for Instructions:***

1 (800) 225-3865

Site Selection

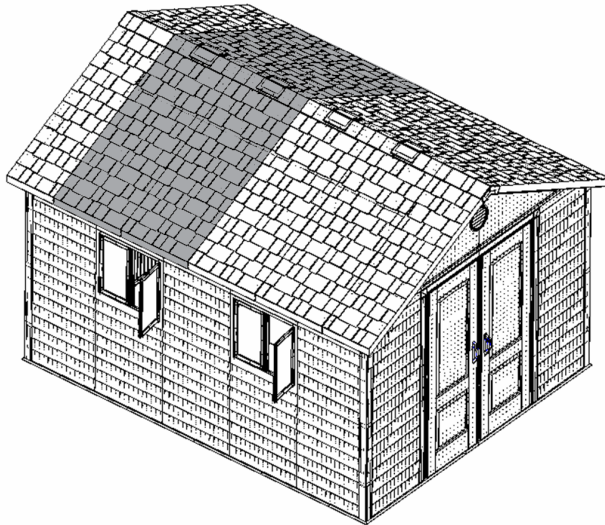

- a. This extension kit adds another 30" to the length of your shed. Before beginning expansion of your shed be sure that your site can accomodate the new size.

Option 2: Add Extension Kit to an Existing Shed

****Save all hardware for re-assembly!****

ATTENTION: If your existing shed is anchored to the ground, remove all anchoring hardware before following these steps.

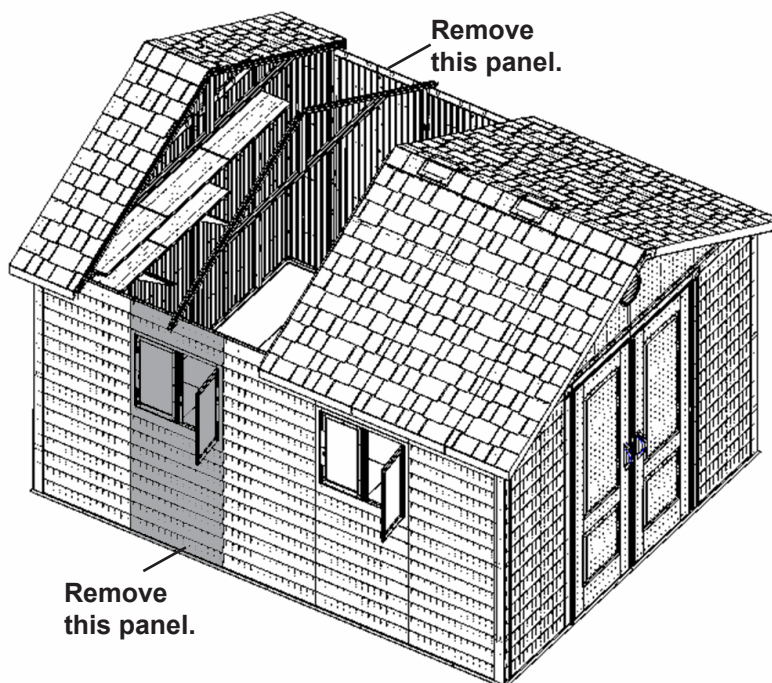

Opt. 2.1: Remove the four Lower Roof Panels and two Center Roof Caps (leave Skylights in place) that are highlighted below.

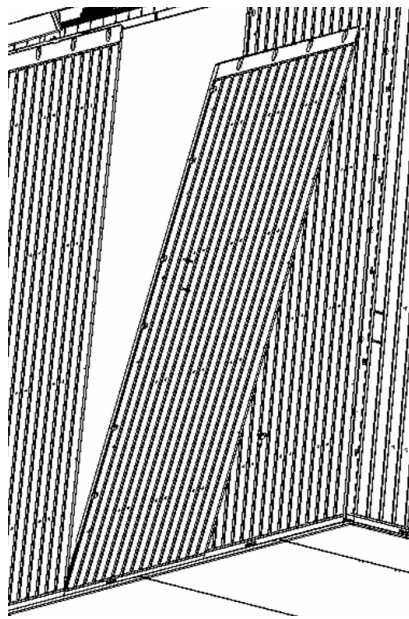

Note: Your shed may be shorter than shown above. Skip the very back Roof Panels (slightly more narrow than the middle Roof Panels) and then remove the next two Roof Panels from each side of the shed (along with the connected Roof Caps).

Repeat Steps 2.2 through 2.4 for both sides of the shed.

Opt. 2.2: Remove all screws from the highlighted Wall Panel that connect it to adjoining Wall Panels and to the Wall Support.

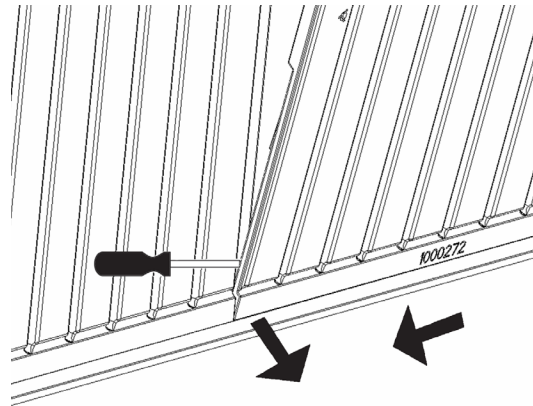

Opt. 2.3: Tip the Wall Panel inward.

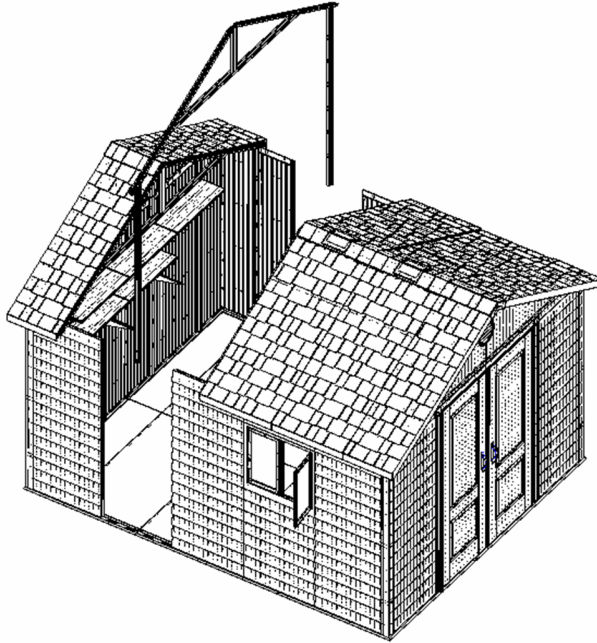

Note: To remove a Wall Panel, slide it to the left (when looking at it from inside the shed) until it lifts out.

Opt. 2.4: Use a long flat screwdriver to gently pry the bottom corner of the Wall Panel so that it has room to slide on the inside of other Wall Panels. Slide the Wall Panel to the left, and then remove the panel.

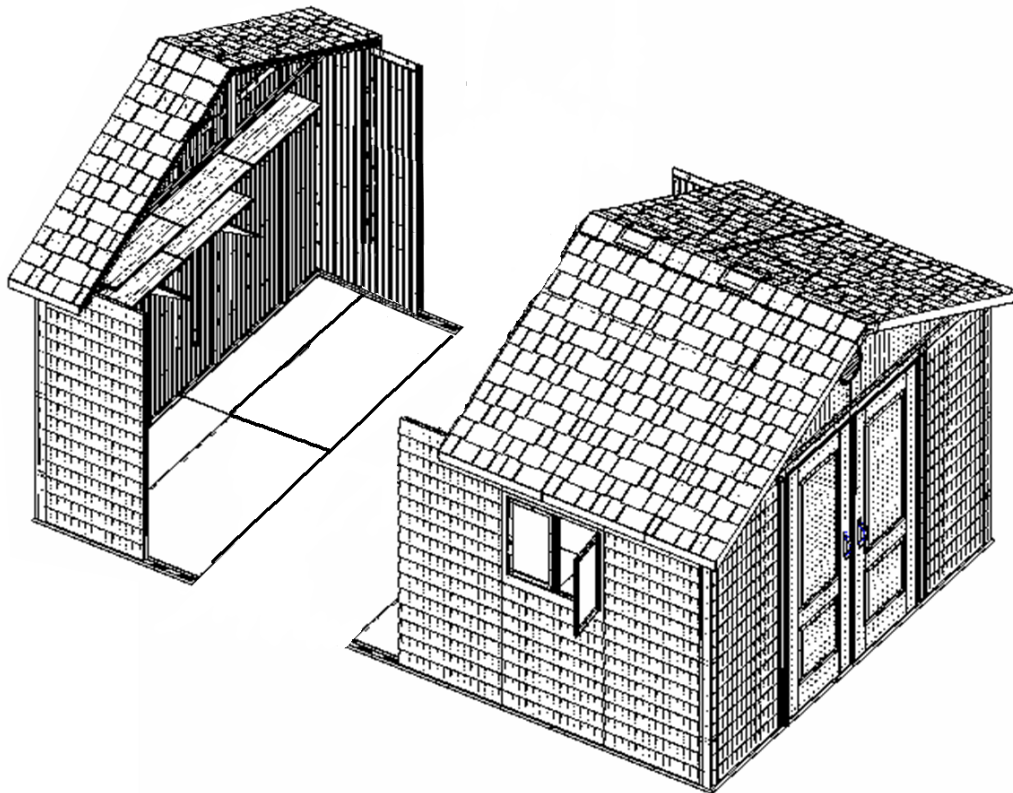

Note: As you remove the Wall Panels, have one person support the Truss assembly so that it does not fall over.

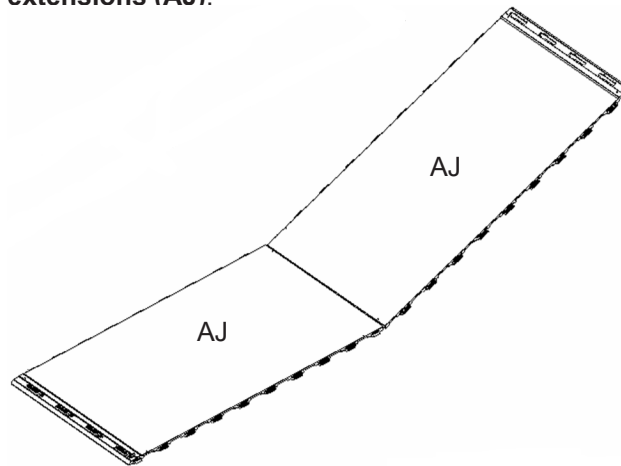

Opt. 2.5: Remove the Truss assembly and set it aside for later.

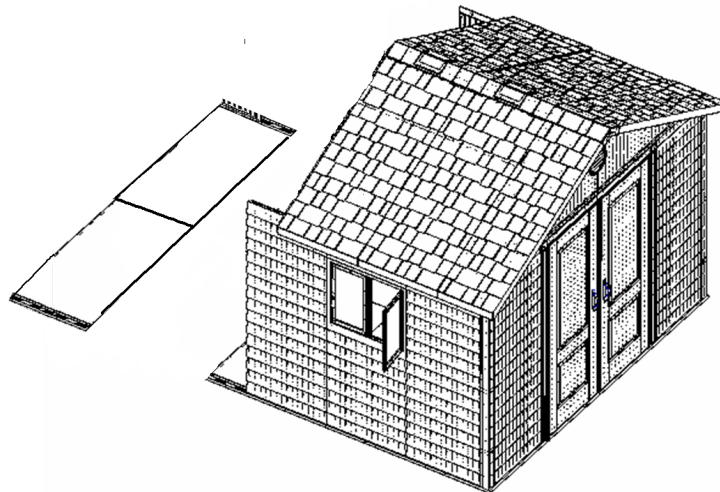

Opt. 2.6: With at least on person on each side of the shed, tip the back section of the shed forward to about a 45 degree angle and slide the back section away from the shed..

Opt. 2.7: Fit together the two Inner Floor Panel extensions (AJ).

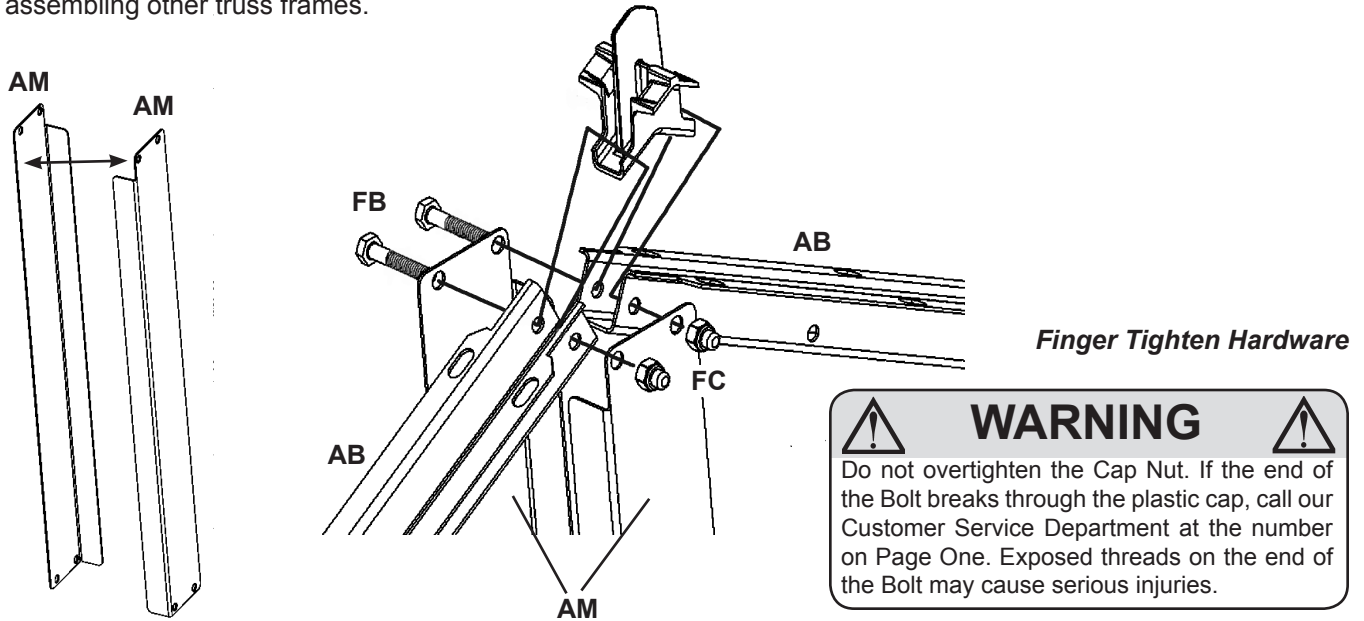

Opt. 2.8: Connect the Inner Floor Panel extensions (AJ) to the other Inner Floor Panels on the main section of the shed.

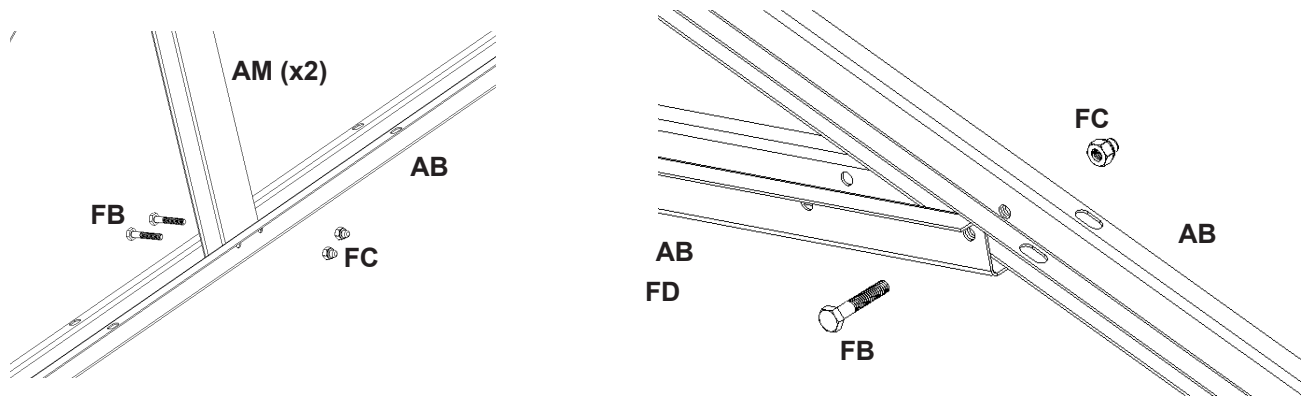

Opt. 2.9: With at least one person on each side of the shed, tip the back section of the shed forward to about a 45 degree angle and slide it forward to re-connect it to the rest of the shed.

Opt. 2.10: Fit two **Truss Support Strips (AM)** together. Bolt **Truss Support Strips (AM)**, **Center Gutter Connector (FD)** and two **Gutter Channels (AB)**. Refer to the Owner's Manual that came with your shed when assembling other truss frames.

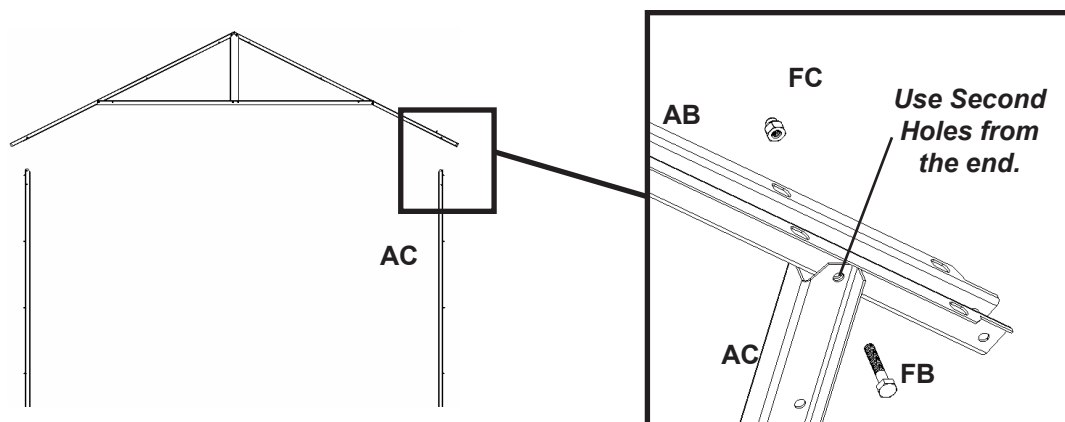

Opt. 2.11: Attach a **Gutter Channel (AB)** (**Truss Support Strips (AM)** fit inside **Gutter Channel (AB)**). Attach **Truss Channel (AD)** to **Gutter Channel (AB)** at each end.

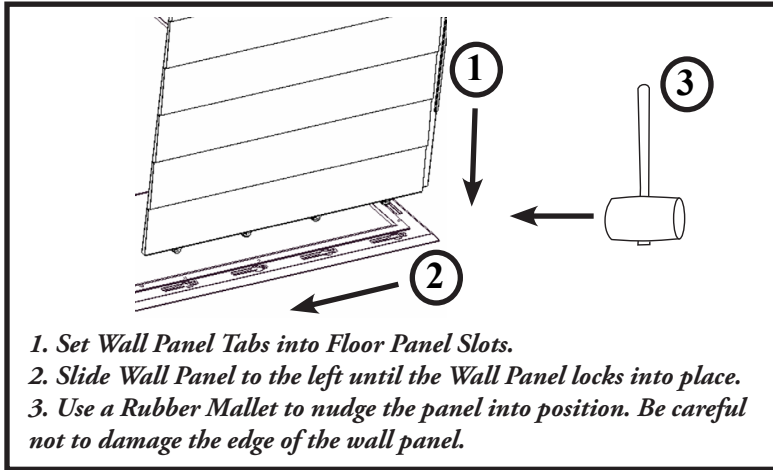

Tighten All Hardware

Opt. 2.12: Attach **Truss Assembly** to two **Wall Support Channels (AC)**. Do not completely tighten the **Cap Nut (FC)** until after truss is secured to the wall.

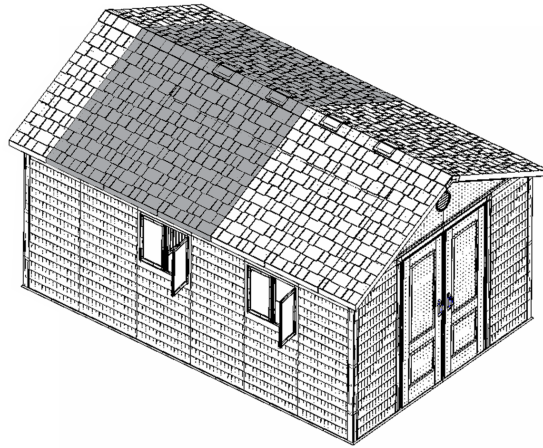

Opt. 2.13: Replace the two Wall Panels that were previously removed. Add the two new Wall Panels that came with this kit.

Note: As new panel slides into place be sure that screw bosses along the sides interlock properly with the adjoining Wall Panels.

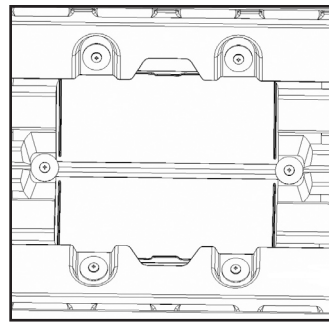

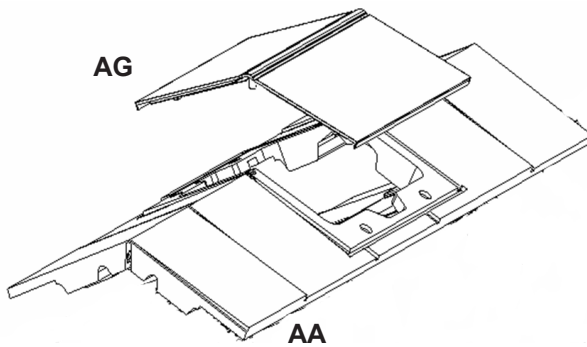

Opt. 2.14: Replace the Truss assembly that was previously removed. Add the new Truss assembly from steps 2.9 to 2.11.

Opt. 2.15: Replace the four Lower Roof Panels that were previously removed. Add the two new Lower Roof Panels that came with this kit.

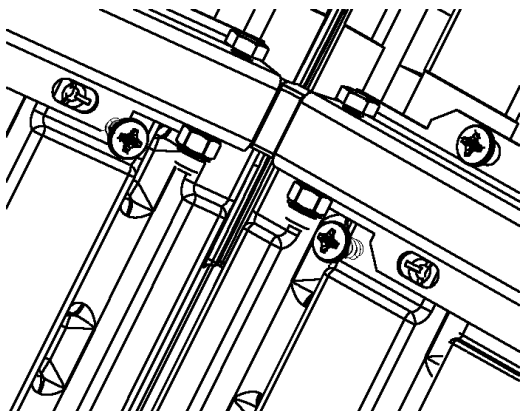

Opt. 2.16: Install the Skylight (AG) into the Center Roof Cap (AA) that came with this Kit.

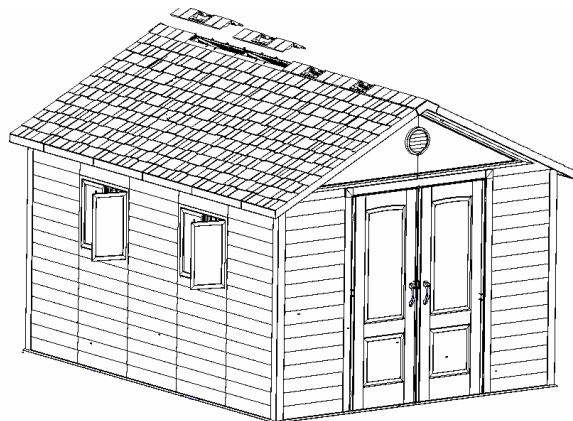

Only use a hand screwdriver for the Skylights

Attach Skylight with #10 Washers (LA) and #10 x 5/8" Screws (LB).

Opt. 2.17: Install both Center Roof Caps (with Skylights) onto the shed.

Attach Roof Cap (AA) to Truss on both sides with 1/4" x 5/8" Screws (SS).

Enhance your Lifetime® Outdoor Shed by purchasing the following Shed Accessories:

Model #

0111

Window Shutters

Two decorative window shutters.

Congratulations on your Lifetime® Outdoor Shed purchase. By following the instructions below, your new Lifetime shed should provide you with years of service and enjoyment.

Cleaning and Care

The polyethylene walls and shelves are stain- and solvent resistant. To clean, use a mild soap and a soft-bristled brush. Abrasive cleaning materials may scratch the plastic and are not recommended. Repair scratches or rust spots on the metal by Sanding the affected area lightly; using a rust preventative spray primer; and finally, spraying with a high-gloss spray enamel paint. Avoid placing a direct heat source on or near surfaces unless using a heat barrier.
