cold treatment

${f COLD}$ PACKS and ${f COVERS}$

- cold pack is a simple and effective method of applying cold therapy to a localized area
- pack maintains cold for up to 30 minutes
- remain pliable and soft even below freezing (to 12°F / -11°C).
- available in standard blue vinyl and extra heavy-duty black urethane; black urethane packs can withstand heavy use
- apply pack with a Relief Pak[®] cover or towel to reduce cold
- when treatment is complete pack can be stored in plastic bag in freezer
- cold therapy can soothe discomfort from injury, sprains and strains, muscle soreness, bruises, swelling, and tension headaches

Instructions for Use

Chill Cold Pack

Place flat in chilling unit or freezer; do not chill below 0°F (-17°C).

Application

- Place a ReliefPak® cover or hand towel between skin and cold pack; apply to area 1 being treated.
- Treat for up to 30 minutes.

Care for Cold Pack

- 1. Wipe all moisture from cold pack before returning it to freezer.
- It is best to store cold pack in freezer flat, not folded. 2.
- 3. Cold packs are most serviceable when kept at 12°F (-11°C).
- Store cold pack in freezer when not in use.

Precautions

- DO NOT sit, lie or apply excessive pressure on cold pack. 1.
- Monitor cold pack application to insure skin is not being irritated by cold.
- DO NOT chill below 0°F (-17°C).
- DO NOT attempt to use the cold pack as a hot pack: DO NOT heat in hot water: DO NOT put cold pack in microwave; the cold pack is ONLY for cold therapy.
- Limit treatment time to 30 minutes per application.
