

Heat and Moisture Exchanger (HME)

McKesson heat and moisture exchangers (HME) are designed to help prevent issues with mucus production and coughing by humidifying and filtering the air you breathe. The main flow bacterial/viral filter is compatible with oxygen concentrators, ventilators, and nebulizers to improve air quality. Connect this filter with standard corrugated tubing.

Features and Benefits

Heat and Moisture Exchangers (HME/HMEF)

- Provides short-term airway humidification
- Prevents breathing system contamination
- Bacterial/viral filtration efficiencies in excess of 99.9%
- High moisture retention characteristics
- Luer gas sampling ports on most HME and HMEF products
- Not made with natural rubber latex

Main Flow Bacterial/Viral Filter

- Low resistance to gas flow
- Bidirectional flow
- Non-conductive
- Sonically sealed
- No chemical adhesives
- Not made with natural rubber latex

Satisfaction Guaranteed
If you are not completely satisfied with any McKesson Brands product, you may return it for a full refund or credit.
