

Manual Serological Controller

McKesson manual serological controllers are available in your choice of five colors. They provide easy, accurate filling and dispensing of serological pipettes between 0.1 to 100mL. Squeeze the bulb to fill your pipette, then aspirate by moving the analog lever - slightly for slow, more for fast. Blow out is accomplished by pressing the button just below the bulb. Your manual controller is protected by an easy-to -replace internal 3µm hydrophobic filter.

Features and Benefits
