

IT'S NOT DESTROYED IF IT'S NOT DETERRA

Everyone deserves access to safe, simple and permanent at-home drug disposal.
Why choose the Deterra® Drug Deactivation System?
We'll keep it simple – **it's not destroyed if it's not Deterra.**

FEATURES AND BENEFITS:

- Deterra is the only independently tested and environmentally sound drug disposal system that permanently deactivates pills, patches, liquids, creams and films.
- The patented Deterra System is powered by proprietary organic activated carbon to render drugs inert and safe for disposal in the normal household trash.
- Deterra's plant-based packaging is USDA Certified, 50% or more bio-based and has earned the *I'm green™* plastic certification.
- Deterra deactivates all organic medications including opioids.*

HOW IT WORKS

Deterra is a simple and safe medication disposal system that can be used at home or in a clinical setting. It protects our environment and prevents drug abuse by immediately and permanently deactivating and disposing of unneeded pills, patches, liquids, creams and films.¹

The patented three-step Deterra Drug Deactivation System is powered by proprietary organic activated carbon to render drugs inert and safe for disposal in the household trash.

1

Tear open pouch – do not remove inner pod(s). Place unused medications inside.

2

Fill pouch halfway with warm water and wait 30 seconds for air to release. Some foaming may occur.

3

Seal pouch tightly, gently shake and dispose of in normal trash.
