Glycerin	Humectant
Ethylhexyl Stearate	Emollient
Glyceryl Stearates	Emulsifying Agent
Zea Mays Oil	Emollient
Polyglycerol-3 Methylglucose Distearate	Emulsifying Agent
Cetearyl Alcohol	Viscosity Controlling Agent
Dicaprylyl Carbonate	Emollient
Hydrogenated Coco-Glycerides	Emollient, Skin Conditioning
Panthenol	Skin Conditioning Agent
Tocopheryl Acetate	Antioxidant
Hydroxyethyl Acrylate/Sodium Acryloyldimethyl Taurate Copolymer	Viscosity Controlling Agent
Betaine	Humectant, Skin Conditioning Agent
Xanthum Gum	Emulsion Stabilizing, Viscosity Controlling Agent
Sodium Citrate	Buffering (pH adjuster)
Phenoxyethanol	Preservative
Benzoic Acid	Preservative
Dehydroacetic Acid	Preservative
Tocopherol	Antioxidant
Citric Acid	Buffering (pH adjuster)
Sorbitan Isostearate	Emulsifying Agent
Polysorbate 60	Emulsifying Agent

Safety

Keep out of reach of children.

The product formulation, production, safety evaluation and documentation comply with Essity's rigorous standards. Production complies with current good manufacturing practices (cGMP). The active ingredient has a long history of safe use.

First aid

Upon eye contact, rinse the eye for several minutes with lukewarm water. If irritation remains, consult a doctor/physician (eye specialist) for advice on further treatment. If discomfort occurs after skin contact, immediately wash off with water. If skin irritation persists, consult a physician. Upon ingestion of larger amounts, do not induce vomiting. Rinse the mouth and drink about one

glass of water. Where appropriate, consult the Poison Control Center or a doctor. In the case of babies/infants, always contact the Point Control Center or doctor as a precautionary measure.

Physical properties

Appearance: white

Physical state: cream, oil-in-water emulsion

Smell: fragrance free

pH: 5

Storage and period of use

Best before: 36 months after production date (see package).

Period After Opening (PAO): 12 months

Recommended storage: Store at normal room temperature in a dry, well-ventilated area. Protect from

freezing, direct sunlight, extreme temperature variations and excessive heat. Exposure to excessive heat (approx. 105°F) will accelerate the aging of the product and the product durability cannot be guaranteed. Freezing, direct sunlight and extreme temperature variations can affect the appearance and consistency of the product.
