

Disposable Ball Electrodes

McKesson Argent® ball electrodes are 3/32" inch diameter and feature a stainless steel shaft. They ship in a patented tray to maintain shape and size and feature safety grip insulators. These ball electrodes have tungsten wire for superior shape and wire integrity throughout the excision procedure, while minimizing thermal damage and yielding excellent histopathology specimens. They are packaged in individual sterile packaging.

Features and Benefits

- » Stainless steel shaft
- » Ship in a patented tray to maintain shape and size and features safety grip insulators
- » Packaged in individual sterile packaging
