Ultrasonics® AP

ALLOWS AIR TO FLOW THROUGH — and nothing else!

As noted in
WOCN 2003 Guidelines:

“Managing skin moisture is a critical factor in maintaining skin integrity and reducing the incidence of pressure ulcers.”

ONEpad for healthier skin:

The innovative backsheet on **Ultrasorb[®] AP** allows air to flow through the pad while still acting as a barrier to moisture.* *The result is superior skin dryness and comfort.*

ONEpad for lower cost:

Ultrasorb[®] AP are so strong and absorbent that they eliminate the need for multiple pads. They can also reduce the need for draw sheets, linens or reusable underpads. *This results in a dramatically lower cost.*

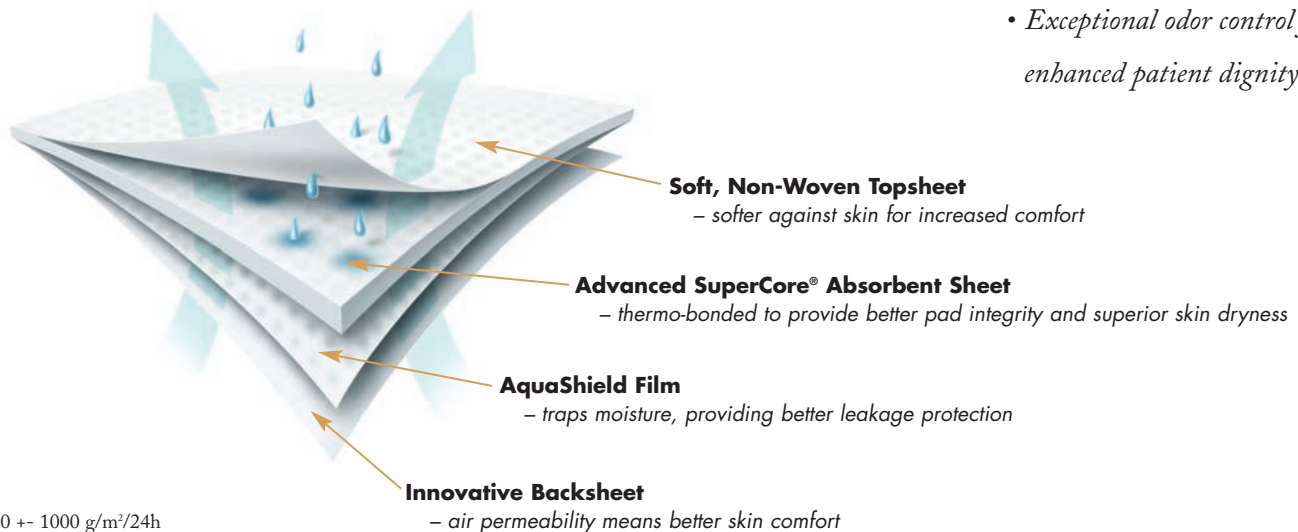

ONEpad for easier care:

Ultrasorb[®] AP can be used on both standard beds and air-support therapy beds.

Other benefits of **Ultrasorb[®] AP** include:

- *SuperCore[®] thermo-bonded core does not come apart or bunch up like traditional disposable underpads*
- *Exceptional odor control for enhanced patient dignity*

Ultrasorb[®] AP Advanced Technology

*MVTR of 3600 +/- 1000 g/m²/24h

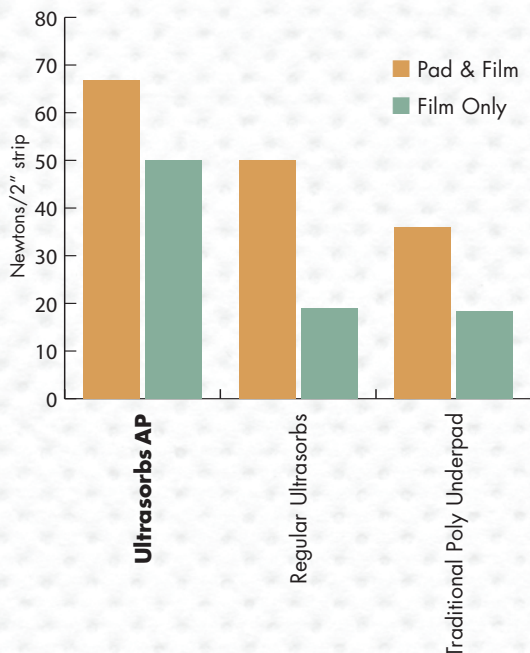

Indications for Use

- Open-airing incontinence management
- ICU/CCU patients who should not be disrupted/moved more than necessary
- ER for absorbing significant/ongoing fluid loss
- Labor and delivery
- OR use
- Any other area where skin dryness is needed

Underpad Comparison

(pad & film breaking strength)

Ultrasorbs^{AP} Premium Disposable DryPad

Protects the patient, not just the bedding

- Air-permeable, moisture-proof backsheet provides superior skin dryness and comfort
- Advanced thermo-bonded SuperCore[®] wicks moisture away from the skin and locks fluid away for increased patient dignity and better skin care
- Super absorbent – one **Ultrasorbs^{AP}** equals the absorbency of three or more traditional underpads
- Exceptional odor control
- High-strength pad and film provide exceptional resistance to tearing and resulting linen changes
