

ATRIX Canister Vacuum, #AHC-1

NOTICE: This vacuum has a TCO (Thermal Cut Out) to protect the vacuum from damage in the event airflow is restricted.

If airflow is restricted the vacuum will get warm. There may be an odor. If the vacuum is run for a period of time with restricted airflow, and the temperature reaches the protective limit, the vacuum will turn off.

Wait 20-30 minutes for the vacuum to cool and operate normally.
